Bachelor's degree
University of National and World Economics

09/2021 - 06/2025

Courses
- Marketing

JavaScript Web Developer
Software University (SoftUni)

03/2021 - 08/2023

Courses
- ReactJS
- JS Back-end - NodeJS / Express
- Angular
- ASP.NET Fundamentals / Advanced

PROJECTS

Cardflow (10/2023 - 02/2025)
- An open-source web platform for buying, selling, and trading TCG items like Yu-Gi-Oh cards, developed in collaboration with other developers. I participated in the project as the main front-end engineer
- I implemented almost every front-end feature of the app. Some of those include internalization, client-side authentication, implementing the designs of pages and making them interactive and responsive, and many more
- I have also contributed a few bug fixes to our backend and have reviewed pull requests from external contributors
- **Tech stack:** React, TypeScript, Material UI, TailwindCSS, Django REST Framework
- **Repository:** https://github.com/julkascript/cardflow

Quiz World
- A web application that allows users to play on and create quizzes. Supports single-choice, multiple-choice, and text-based questions
- **Tech stack:** Angular 20, Angular Material, ASP.NET 8, MS SQL Server, Redis
- **.NET back-end repository:** https://github.com/RyotaMitaraiWeb/QuizWorld
- **Angular front-end repository:** https://github.com/RyotaMitaraiWeb/Quiz-World

Vue Flashcards
- A web application for building flashcards which can be used for effective studying
- **Tech stack:** Vue, Vuetify, TypeScript, NestJS, PostgreSQL
- **Vue front-end repository:** https://github.com/RyotaMitaraiWeb/Flashcards
- **NestJS back-end repository:** https://github.com/RyotaMitaraiWeb/Flashcards-Service
